

## Job Posting: **Clinical Counsellor for Trauma Focused Counselling Centre**

Tidal Trauma Centre is a group of specialized mental health professionals, dedicated to providing quality counselling and trauma therapy, in-person and online.

As we grow, we are looking for Master's level counsellors (RCC, CCC, RSW) with post-graduate training in trauma therapy and mind-body approaches to join our team. Our office is located in central Cloverdale, and is easily accessible to clients coming from Surrey, Delta, Langley, White Rock, and Vancouver. We are also looking for remote practitioners, who prefer to work online from their own location.

We're committed to helping clients match with the right counsellors ... but we're also focused on connecting our counsellors to the right clients and career opportunities that engage and fulfill them. We put a high priority on investing in the wellbeing of our counsellors - as the best therapy happens when both client and counsellor feel comfortable and confident.

Our team works as independent contractors at a competitive split fee with opportunities for increase, access to beautifully equipped office space, marketing, technology and resources to make your life easier, and steady client referrals with administrative and clinical support.

A few things that set us aside:

- Competitive compensation: Our compensation model is flexible and based on counsellors' experience, training, skills (such as multiple languages or experience with marginalised communities) and caseload - not a one-size-fits-all approach
- Support intensive: In-house mentorship and coaching, monthly peer consults, quarterly trainings, and opportunities for groups and workshops
- Growth oriented: Incentives for continuing your education and training, opportunities for skill development (including but not limited to clinical, we also coach our team on small business ownership and financial planning and proficiency)

Requirements:

- Masters or Doctoral degree in Clinical Psychology, Counselling Psychology or Social Work, with appropriate registration and current liability insurance
- Advanced level training and experience from a trauma and/or neurobiological-based lens (OEI, EMDR, LI, EFT, AEDP, EFT, CBT, Somatic or Sensorimotor Psychotherapy, Mindfulness-based training)
- Experience and comfort with working with PTSD, CPTSD, dissociation, depression, anxiety, OCD, ADHD, grief and loss, illness and injury (acute and chronic).
- Self-motivated, forward-thinking and able to work autonomously
- Participates in ongoing professional development, training, consultation and supervision
- Awareness of and compliance with ethical practices
- Dedicated to professional growth and working within a practice long-term

If you feel you could be a good fit for our team, please send a cover letter and resume to "application@tidaltrauma.com". Please include a description of the kind of clients and presenting problems you most enjoy working with. If you are familiar with your MBTI and Enneagram types, please include as well. Successful applicants will be contacted for an interview.
